

Evolution XLC-10 Line Card

The Evolution XLC-10 line card features the DVB-S2 standard with Adaptive Coding and Modulation (ACM) on the outbound (or downstream). The line card fits in any universal hub chassis and supports data rates up to 138 Mbps, which makes network expansion simple and easy. It is ideally suited for broadband applications such as Internet and VPN access to enterprise networks, along with real-time VoIP and videoconferencing.
